Profile

Profile Summary
- A full stack developer with high problem-solving skills and develops complex projects.
- I have proficiency in IoT Devices and built projects which can be used by a widespread of people.
- Developed a highly scalable attendance system which is used regularly in our college.
- Working professionals achieved Posture improvement with help of my Smart Chair.
- Identified the visual inaccuracies in the existing college website and improved the UI.
- Possesses in-depth knowledge of multiple technology stacks which in turn contributes to an efficient development stage of products.

ACADEMIC PROJECTS

Blood Bank Management
I developed a comprehensive Blood Bank Management System using HTML, CSS, PHP, and Bootstrap.
This project aimed to streamline blood donation processes by facilitating donor registration,
inventory management, and appointment scheduling. Leveraging Bootstrap for responsive design, I
ensured a user-friendly interface across devices. My responsibilities included frontend development
with HTML and CSS, backend logic implementation in PHP for data processing, and integration with a
MySQL database for seamless data management.

E-commerce Shopping
I designed and developed an E-commerce Shopping platform using HTML, CSS, PHP, and Bootstrap.
This project enabled seamless browsing, product listing, and secure checkout functionalities.
Implementing responsive design principles with Bootstrap ensured a consistent user experience
across devices. My role encompassed frontend development using HTML, CSS, and Bootstrap for
UI/UX enhancement, PHP scripting for backend functionalities like user authentication and database
interactions, ensuring a robust and user-friendly online shopping experience.
